

Merger between Industrie De Nora, De Nora Elettrodi and De Nora Technologie Elettrochimiche.

On November 30th, 2006 the merger between Industrie De Nora S.p.A., De Nora Elettrodi S.p.A. and De Nora Technologie Elettrochimiche S.p.A. was concluded successfully.

The purpose of this maneuver is that of developing a more efficient operational system aimed at providing a better service both to the market and the Customer. Concomitantly, the facilities of via dei Canzi 1 have been closed; the technological advancement of these facilities was obstructed by external constraints.

Industrie De Nora will dispose of certain functions at a corporate level and will be articulated in two divisions: Elettrodi Network and R&D Division. Elettrodi Network will be appointed to develop and coordinate all the production facilities, directing market and Customer development.

The R&D Division, through synergic efforts of the two research groups located in Milan (Italy) and Fairport (USA), will develop and maintain the competitive edge that has always characterized the Gruppo De Nora, world leader in electrochemical technologies.
